TOOLS: Postman, GIT, Jira, AI, Claude code, Cursor IDE

DATABASE: PostgreSQL, MySQL, MongoDB.

TESTING & QUALITY: Code Reviews, API Testing, Manual Testing.

PROJECTS

Gyftport – Gift Card Marketplace Platform

Senior Software Engineer / Technical Lead

- Led backend and web platform development while collaborating with mobile teams to drive architectural decisions and seamless cross-platform integrations.
- Implemented background jobs using Celery and RabbitMQ for asynchronous order processing.
- Developed and maintained GraphQL and REST APIs enabling seamless integration with external partner systems and third-party platforms
- **Tech Stack:** Django, Python, Next.js, PostgreSQL, Redis, RabbitMQ, Celery, GRAPHQL, JWT Auth, AWS EC2, Nginx, PM2, CloudFront, Razorpay, Git, Postman.

Myfinalyst – SaaS Financial Platform ↗

Frontend & Integration Development

- Integrated Tally ERP, Tally Prime, and Microsoft Business Central for automated financial synchronization and reporting.
- Developed production-ready frontend from Figma designs with responsive dashboards, analytics tables, and financial workflows.
- Collaborated with backend teams to integrate APIs, optimize data pipelines, and improve analytics workflows
- Built modules for Loans, Receivables, Accounting Policies, and financial reporting systems.
- **Tech Stack:** React, Redux, Java Spring Boot, MongoDB, REST APIs, Postman.

Onecall Ai Onboarding – Insurance Automation Platform ↗

Full Stack Development

- Implemented AI face scan integration, BMI calculator, video/audio interview workflows, and health verification system.
- Developed onboarding platform for insurance workflows including biometric verification, interview processing, and automated document generation.
- **Tech Stack:** Django, Python, Next.js, MySQL, RESTAPI, JWT Auth, Git, Postman.

Hirelines – Hiring SaaS Platform ↗

Full Stack Development

- Contributed to development of SaaS recruitment platform automating screening, coding assessments, interviews, and candidate workflows.
- Integrated APIs for coding assessments, automated scoring systems, interview scheduling, and hiring workflows.
- Managed deployments and production infrastructure using AWS EC2, PM2, Nginx, and CloudFront.
- **Tech Stack:** Django, REST APIs, MySQL, HTML, JavaScript.
